

I tried some techniques to deal
with childhood trauma or life's
ups and downs. Telling my own
story via film is one of them.

it involves
ethical
responsibility
to citizens

FILMMAKING

In my role
at the ~~the~~,
I collaborate
with citizens
to create films...

← I sometimes
lack patience.

Participation
in this study is
completely voluntary.

By watching your film
someone may feel connection
and realise that they're
not alone...

I'm listening to Miles Davis at the moment.
I like to put ~~parts of myself~~ into research.
I'm curious to hear ~~your stories~~.
Telling one's own story has been proven
to have ~~therapeutic benefits~~. on the other
hand, it's a vulnerable experience.

Let's do it together...

I cannot make it invisible if something happens
because it is there. → this line... ←
